# HOME LEARNING

Don't forget! You can send home learning work to  
y5homelearning@exwickheights.devon.sch.uk

## Science– Recap, materials and their properties

### Soluble or insoluble?

Conduct your own tests at home using different materials. Do they dissolve in water and form a solution? Does the temperature of the water affect how quickly the substance dissolves? Report your findings in a table or using photos or diagrams. (If you are using hot water, make sure your grown up is helping you).

### Easter

In preparation for Easter, why not choose an Easter activity that you would enjoy. Design an 'Easter Garden' which is a traditional Christian craft that tells the story of Easter. It depicts the place where Jesus was buried and the stone door of the tomb rolled away... Other activities for Easter might include painting an egg (best to boil it first), make yourself an Easter Bonnet and research its tradition, or try baking some Easter biscuits (with an adult) yum....!

## Spelling Shed

Please head to Spelling Shed to complete this week's spellings.

### Reading:

**Read as often as you can!**

**Make sure that you record your reading in your Reading Journal every day. Read each night for half an hour with an adult's signature once a week for a Read to Succeed ticket—you'll be in with a chance of winning a book!**

### Vocabulary builder:

From your class or library book, pick a chapter to explore. Find 10 words that are great examples of quality vocabulary and draw a picture to show what each word means!
